Beyond the Bubble Test 2014-05-14 Linda Darling-Hammond Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

Classroom Management in Teacher Education Programs 2017-09-22 Jonathan Ryan Davis This book investigates the impact of integrating culturally relevant and pedagogically dynamic classroom management strategies into the curriculum of an urban secondary education pre-service methods course. The book begins by framing the problem of integrating classroom management into the lives of those learning to teach impact. It then examines multiple case studies of students from the study's control cohort who did not have classroom management coursework in their methods course. After breaking down the challenges encountered by the control students, the book offers DCMA as a framework from which teacher educators might create an integrative methods course. The book then analyzes students from the study's experimental cohort and how they benefited from such an integrative course throughout their teacher preparation and into their first year of teaching.

Measuring History 2009-03-01 S. G. Grant Measuring History complements the cases presented in Wise Social Studies Practices (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of Measuring History are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

How to Innovate 2014-12-04 Mary Moss Brown As the authors state, “Without rethinking how, what, when, where, and why we are teaching, technology will merely be an expensive way of making the existing system faster and flashier.” In How to Innovate, Mary Moss Brown and Alisa Berger—founding co-principals of the NYC iSchool—apply their extensive on-the-ground experience to demonstrate a radically different approach to school transformation. They introduce a scalable model of how schools can and should redefine themselves to better meet the needs of 21st-century students. Using a framework built around four critical levers for school change—curriculum, culture, time, and human capital—the NYC iSchool model merges the teaching of big ideas and valuable skills with the realities of accountability, academic preparation, and adolescent development.The bookincludes more than 20 activities that will help educators begin the process of school transformation, whether they want to focus on a single program, one area of change, or engage in a full-scale whole school improvement effort. This accessible, practical, and inspiring resource is designed to be used over and over again, in any context, despite the constantly changing climates in which schools operate. “Reimagining school and creating more schools like the iSchool must be our highest national priority. All students need to graduate from high school and college ‘innovation-ready,’ as well as prepared for the complex challenges of continuous learning and citizenship in the 21st century. Time is running short. I urge you to read this book with urgency.” –From the Foreword by Tony Wagner, expert in residence at the Harvard University Innovation Lab, founder and co-director of the Change Leadership Group at the Harvard Graduate School of Education “Public education mistakenly relies on a 19-century model to teach kids in the 21st century. Moss Brown and Berger decided to change this by opening the iSchool in

New York City and creating a whole new approach to how schools work. They succeeded wildly, and having walked the walk, they now talk the talk so others can follow on the trail they blazed.” –Joel Klein, former Chancellor of the New York City Department of Education (2002–2011) “Those who strive to create or transform a school will learn much from the shining example of these two fearless principals. As learning contexts change with the rising tides of technology, Moss and Berger focus above all on human and intellectual growth in schools. Their NYC iSchool offers hope for increasing imagination, equity, and depth in the face of the gathering storm of standardization.” –Kathleen Cushman, co-founder of What Kids Can Do and author of The Motivation Equation “Moss Brown and Berger launched one of the first schools to blend personalized instruction and community-connected engaging projects. Anyone interested in a picture of next-generation learning and the inside story of creating a great school should read this book.” –Tom Van der Ark, CEO of Getting Smart Mary Moss Brown and Alisa Berger are the founding co-principals of the NYC iSchool and are currently working as the founding partners in Novare Schools, a consulting group that focuses on school leader coaching, school design, innovation, and transformation.

Dialects at School 2017-05-12 Jeffrey Reaser Like its predecessor, Dialects in Schools and Communities, this book illuminates major language-related issues that educational practitioners confront, such as responding to dialect related features in students' speech and writing, teaching Standard English, teaching students about dialects, and distinguishing dialect difference from language disorders. It approaches these issues from a practical perspective rooted in sociolinguistic research, with a focus on the research base for accommodating dialect differences in schools. Expanded coverage includes research on teaching and learning and attention to English language learners. All chapters include essential information about language variation, language attitudes, and principles of handling dialect differences in schools; classroom-based samples illustrating the application of these principles; and an annotated resources list for further reading. The text is supported by a Companion Website (www.routledge.com/cw/Reaser) providing additional resources including activities, discussion questions, and audio/visual enhancements that illustrate important information and/or pedagogical approaches. Comprehensive and authoritative, Dialects at School reflects both the relevant research bases in linguistics and education and educational practices concerning language variation. The problems and examples included are authentic, coming from the authors' own research, observations and interactions in public school classrooms, and feedback in workshops. Highlights include chapters on oral language and reading and writing in dialectally diverse classrooms, as well as a chapter on language awareness for students, offering a clear and compelling overview of how teachers can inspire students to learn more about language variation, including their own community language patterns. An inventory of dialect features in the Appendix organizes and expands on the structural descriptions presented in the chapters.

Meeting the Challenges to Measurement in an Era of Accountability 2016-01-29 Henry Braun Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.

Urban Youth and School Pushout 2012-03-15 Eve Tuck Winner of the 2013 American Educational Studies Association's Critics Choice Award! Recent efforts to reform urban high schools have been marked by the pursuit of ever-increasing accountability policies, most notably through the use of high-stakes standardized testing, mayoral control, and secondary school exit exams. Urban Youth and School Pushout excavates the unintended consequences of such policies on secondary school completion by focusing specifically on the use and over-use of the GED credential. Building on a tradition of critical theory and political economy of education, author Eve Tuck offers a provocative analysis of how accountability tacitly and explicitly pushes out under-performing students from the system. By drawing on participatory action research, as well as the work of indigenous scholars and theories, this theoretically and empirically rich book illustrates urban public schooling as a dialectic of humiliating ironies and dangerous dignities. Focusing on the experiences of youth who have been pushed out of their schools under the auspices of obtaining a GED, Tuck reveals new insights on how urban youth view accountability schooling, value the GED, and yearn for multiple, meaningful routes to graduation.

Social Studies for Secondary Schools 2014-10-08 Alan J. Singer Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, nd Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It's your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

Reviewing the Success of Full-Service Community Schools in the US 2020-03-05 Mavis G. Sanders Originally published as a special issue of the Journal of Education for Students Placed at Risk, this expanded text provides new insights into the successful, sustained implementation of Full-Service Community Schools (FSCSs) in the United States. Reviewing the Success of Full-Service Community Schools in the US documents the experiences of students, teachers, and communities involved in the establishment and growth of FSCSs. By considering how successful this reform strategy has been in meeting the needs of underserved communities, the text illustrates the potential these schools have to transform students' learning and outcomes. In particular, the studies illustrate the value these schools have in supporting low-income students and students of color. At the same time, by interrogating the defining pillars of FSCSs – expanded learning opportunities, integrated services, family and community engagement, and collaborative leadership – chapters identify challenges that if left unattended, could limit the

transformative potential of this reform strategy. This groundbreaking text will be of great interest to graduate and postgraduate students, researchers, academics, professionals, and policy makers in the fields of Educational Change and School Reform, Multicultural Education, Sociology of Education, Education Policy, and School Management and Administration.

A Guide to Teaching in the Active Learning Classroom 2023-07-03 Paul Baepler While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room’s central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed.The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls.This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are:• How can instructors mitigate the apparent lack of a central focal point in the space?• What types of learning activities work well in the ALCs and take advantage of the affordances of the room?• How can teachers address familiar classroom-management challenges in these unfamiliar spaces?• If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point?• How do instructors balance group learning with the needs of the larger class?• How can students be held accountable when many will necessarily have their backs facing the instructor?• How can instructors evaluate the effectiveness of their teaching in these spaces?This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.

A New Deal for the Humanities 2015-11-11 Gordon Hutner Many in higher education fear that the humanities are facing a crisis. But even if the rhetoric about “crisis” is overblown, humanities departments do face increasing pressure from administrators, politicians, parents, and students. In A New Deal for the Humanities, Gordon Hutner and Feisal G. Mohamed bring together twelve prominent scholars who address the history, the present state, and the future direction of the humanities. These scholars keep the focus on public higher education, for it is in our state schools that the liberal arts are taught to the greatest numbers and where their neglect would be most damaging for the nation. The contributors offer spirited and thought-provoking debates on a diverse range of topics. For instance, they deplore the push by administrations to narrow learning into quantifiable outcomes as well as the demands of state governments for more practical, usable training. Indeed, for those who suggest that a college education should be “practical”—that it should lean toward the sciences and engineering, where the high-paying jobs are—this book points out that while a few nations produce as many technicians as the United States does, America is still renowned worldwide for its innovation and creativity, skills taught most effectively in the humanities. Most importantly, the essays in this collection examine ways to make the humanities even more effective, such as offering a broader array of options than the traditional major/minor scheme, options that combine a student’s professional and intellectual interests, like the new medical humanities programs. A democracy can only be as energetic as the minds of its citizens, and the questions fundamental to the humanities are also fundamental to a thoughtful life. A New Deal for the Humanities takes an intrepid step in making the humanities—and our citizens—even stronger in the future.

The Writing Revolution 2017-07-27 Judith C. Hochman "HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

It uniquely offers numerous, real-world examples and case studies that aid working R&D researchers as well as Ph.D. and postdoc students preparing to ace interviews in order to enter the workforce. Edited by two world-leading and established industrial chemists, the book covers flow chemistry (catalytic and non-catalytic organometallic chemistry), various cross-coupling reactions (C-C, C-N, and C-B) in classical batch chemistry, conjugate addition reactions, metathesis, and C-H arylation and achiral hydrogenation reactions. Beginning with an overview of the many industrial milestones within the field over the years, Organometallic Chemistry in Industry: A Practical Approach provides chapters covering: the design, development, and execution of a continuous flow enabled API manufacturing route; continuous manufacturing as an enabling technology for low temperature organometallic chemistry; the development of a nickel-catalyzed enantioselective Mizoroki-Heck coupling; and the development of iron-catalyzed Kumada cross-coupling for the large scale production of Aliskiren intermediates. The book also examines aspects of homogeneous hydrogenation from industrial research; the latest industrial uses of olefin metathesis; and more. -Includes rare industrial case studies difficult to find in current literature -Helps readers successfully carry out their own reactions -Covers topics like flow chemistry, cross-coupling reactions, and dehydrative decarbonylation -Features a foreword by Nobel Laureate R. H. Grubbs -A perfect resource for every R&D researcher in industry -Useful for PhD students and postdocs: excellent preparation for a job interview Organometallic Chemistry in Industry: A Practical Approach is an excellent resource for all chemists, including those working in the pharmaceutical industry and organometallics.

Revolutionizing Modern Education through Meaningful E-Learning Implementation 2016-06-27 Khan, Badrul H. It is not enough for an instructor to merely present facts to their students; the presentation of information must be made accessible and understandable in the context of the student. As communication technologies become more widely available, traditional educational institutions are no longer the only source of information. What is now necessary is to reconsider what makes for meaningful education and apply those practices to digital natives. Revolutionizing Modern Education through Meaningful E-Learning Implementation evaluates the means by which online education can be improved and systematically integrated more fluidly into traditional learning settings, with special focus on the ethical, pedagogical, and design aspects of building online courses. This publication aims to elucidate the rewards and follies of online education for educators, administrators, programmers, designers, and students of education.

Teaching By Numbers 2010-07 Peter Maas Taubman Taubman offers interdisciplinary ways to understand the educational reforms underway in urban education, teaching, and teacher education, and their impact on what it means to teach. He maps the totality of the transformation, taking into account the constellation of forces shaping it, and proposes an alternative vision of teacher education.

Testing Regimes, Accountabilities and Education Policy 2017-10-02 Bob Lingard Around the globe, various kinds of testing, including high stakes national census testing, have become meta-policies, steering educational systems in particular directions, and having great effects on schools and on teacher practices, as well as upon student learning and curricula. There has also been a complementary global aspect to this with the OECD’s PISA and IEA’s TIMSS and PIRLS, which have had impacts on national education systems and their policy frameworks. While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation’s human capital and thus their international economic competitiveness, this discourse still manifests itself in specific, vernacular, path dependent ways in different nations. High stakes testing and its effects can also be seen as part of the phenomenon of the ‘datafication’ of the world and ‘policy as numbers’, linked to other reforms of the state, including new public management, network governance, and top-down and test-based modes of accountability. This edited collection provides theoretically and empirically informed analyses of these developments. This book was originally published as a special issue of the Journal of Education Policy.

Optimizing Higher Education Learning Through Activities and Assessments 2020-06-26 Inoue-Smith, Yukiko The mission of higher education in the 21st century must focus on optimizing learning for all students. In a shift from prioritizing effective teaching to active learning, it is understood that computer-enhanced environments provide a variety of ways to reach a wide range of learners who have differing backgrounds, ages, learning needs, and expectations. Integrating technology into teaching assumes greater importance to improve the learning experience. Optimizing Higher Education Learning Through Activities and Assessments is a collection of innovative research that explores the link between effective course design and student engagement and optimizes learning and assessments in technology-enhanced environments and among diverse student populations. Its focus is on providing an understanding of the essential link between practices for effective “activities” and strategies for effective “assessments,” as well as providing examples of course designs aligned with assessments, positioning college educators both as leaders and followers in the cycle of lifelong learning. While highlighting a broad range of topics including collaborative teaching, active learning, and flipped classroom methods, this book is ideally designed for educators, curriculum developers, instructional designers, administrators, researchers, academicians, and students.
