## **Experiencing Cities**

2020-10-21 Mark Hutter The fourth edition of Mark Hutter's *Experiencing Cities* examines cities and larger metropolitan areas within a truly global framework, lending readers much to understand and appreciate about the variety of urban structures and processes and their effect on the everyday lives of people residing in cities. Beginning with the emergence of the first urban centers and continuing to examine the present day and the future of smart cities, this book explores the changing cultural and domestic character of the metropolis and offers readers a complete historical and theoretical overview of municipal life. The new edition seamlessly integrates issues of gender, race, ethnicity, sexuality, and class in its examination of city and suburban life, and further extends the Chicago School of Sociology perspective by combining its traditions with a distinct social psychological orientation derived from symbolic interaction and macro-level examination of social organization, social change, and power in the

urban context. *With the Door To Door The Magnificent Maddening Mysterious World Of Transportation Pdf Pdf upload* Arnold j Murray

strong and sweeping interdisciplinary approach, the new edition of *Experiencing Cities* will continue to enrich students' understandings of urban life and offer new, forward-looking perspective to those working in the fields of urban sociology, history, politics, geography, and the arts.

## **Unsustainable World**

2022-02-27 Peter N. Nemetz Using a cross-disciplinary, science- and economics-based approach, this book provides a sobering and comprehensive assessment of the multifaceted barriers to achieving sustainability at a global level. Organized into three parts, the book defines sustainability in part I and sets the context of the historical and current difficulties facing the world today. In parts II and III, it outlines the sustainability challenges faced in transportation, manufacturing, and agriculture, and then in turn addresses the solutions, conditional solutions, and nonsolutions to these challenges. These include electric and autonomous automobiles, nuclear power, renewable energy, geoengineering, and carbon capture and storage. The

author attempts to differentiate among those proposed solutions and discusses which are most promising and which are infeasible, counterproductive, and potentially a waste of time and money. In each of the book's chapters, the scientific evidence is presented in detail, in keeping with the advice of the young Swedish climate activist, Greta Thunberg, to let the science speak for itself. The author outlines why sustainability is unlikely to be achieved in several key areas of human endeavor and readers are challenged to weigh the scientific evidence for themselves. Using an economic business-based approach, this book introduces students and general readers to the challenges of sustainability and the environmental difficulties facing humanity today.

## **Inside the Department of Transportation**

2018-07-15 Jennifer Peters Every time you get on an airplane, take a railway train to visit family, or drive down the highway to go on an adventure, you're putting your safety in the hands of the Department of

Transportation. The Cabinet department determines how the country's various public transit systems operate and connect, what the rules are for airline flight, and how highways and roadways are constructed and maintained. Readers will learn about the various rules and regulations the DOT is responsible for, and how those rules help keep us safe whenever and wherever we travel in America.

### **Bicycle Utopias**

2018-12-17 Cosmin Popan  
Bicycle Utopias investigates the future of urban mobilities and post-car societies, arguing that the bicycle can become the nexus around which most human movement will revolve. Drawing on literature on post-car futures (Urry 2007; Dennis and Urry 2009), transition theory (Geels et al. 2012) and utopian studies (Levitas 2010, 2013), this book imagines a slow bicycle system as a necessary means to achieving more sustainable mobility futures. The imagination of a slow bicycle system is done in three ways: Scenario building to anticipate how cycling mobilities will look in the year 2050. A critique of the system of automobility and of fast cycling futures. An investigation of the cycling senses and sociabilities to describe the type of societies that such a slow bicycle system will enable. Bicycle Utopias will

scholars in fields such as sociology, mobilities studies, human geography and urban and transport studies. This work may also be of interest to advocates, activists and professionals in the domains of cycling and sustainable mobilities.

### **Infrastructural Brutalism**

2020-09-01 Michael Truscello  
How “drowned town” literature, road movies, energy landscape photography, and “death train” narratives represent the brutality of industrial infrastructures. In this book, Michael Truscello looks at the industrial infrastructure not as an invisible system of connectivity and mobility that keeps capitalism humming in the background but as a manufactured miasma of despair, toxicity, and death. Truscello terms this “infrastructural brutality”—a formulation that not only alludes to the historical nexus of infrastructure and the concrete aesthetic of Brutalist architecture but also describes the ecological, political, and psychological brutality of industrial infrastructures. Truscello explores the necropolitics of infrastructure—how infrastructure determines who may live and who must die—through the lens of artistic media. He examines the white settler nostalgia of “drowned town” fiction written after the Tennessee Valley Authority flooded rural areas for hydroelectric

projects; argues that the road movie represents a struggle with liberal governmentality; considers the ruins of oil capitalism, as seen in photographic landscapes of postindustrial waste; and offers an account of “death train narratives” ranging from the history of the Holocaust to postapocalyptic fiction. Finally, he calls for “brisantic politics,” a culture of unmaking that is capable of slowing the advance of capitalist suicide. “Brisance” refers to the shattering effect of an explosive, but Truscello uses the term to signal a variety of practices for defeating infrastructural power. Brisantic politics, he warns, would require a reorientation of radical politics toward infrastructure, sabotage, and cascading destruction in an interconnected world.

### **Authentic Project-Based Learning in Grades 9-12**

2019-08-21 Dayna Laur  
Authentic Project-Based Learning in Grades 9-12 provides a clear guide to design, develop, and implement real-world challenges for any high school subject. The author lays out five clear, standards-based stages of assessment to help you and your learners process the what, how, and why of authentic project-based experiences. You'll learn how to create projects that: Align with your content standards Integrate technology effectively

Support reading and writing development Utilize formative assessment Allow for multiple complex pathways to emerge Facilitate the development of essential skills beyond school Each chapter includes a variety of practical examples to assist with scaffolding and implementation. The templates and tools in the appendix are also provided on our website as free eResources for ease of use.

### **Self-Driving Cars**

2018-08-01 Michael Fallon Self-driving cars mark the next great shift in mass transportation. Learn about early attempts at self-driving technology, the benefits of driverless cars, controversies surrounding the new technology, innovations that make self-driving cars possible, and the industry's major players. This emerging "disruptive" technology has its roots in the work of engineers and futurists dating back decades. Author Michael Fallon traces how the software and hardware for self-driving vehicles developed through the years, including major milestones, notable misfires, and efforts from the public and private sectors. He also spotlights recent breakthroughs that have made self-driving vehicles viable on a mass scale, along with the public debate that these breakthroughs have created.

*Door to Door*  
2016-04-12 Edward Humes  
The Pulitzer Prize-winning journalist and author of *Garbology* explores the hidden and costly wonders of our buy-it-now, get-it-today world of transportation, revealing the surprising truths, mounting challenges, and logistical magic behind every trip we take and every click we make. Transportation dominates our daily existence. Thousands, even millions, of miles are embedded in everything we do and touch. We live in a door-to-door universe that works so well most Americans are scarcely aware of it. The grand ballet in which we move ourselves and our stuff is equivalent to building the Great Pyramid, the Hoover Dam, and the Empire State Building all in a day. Every day. And yet, in the one highly visible part of the transportation world—the part we drive—we suffer grinding commutes, a violent death every fifteen minutes, a dire injury every twelve seconds, and crumbling infrastructure. Now, the way we move ourselves and our stuff is on the brink of great change, as a new mobility revolution upends the car culture that, for better and worse, built modern America. This unfolding revolution will disrupt lives and global trade, transforming our commutes, our vehicles, our cities, our jobs, and every aspect of culture, commerce, and the

environment. We are, quite literally, at a fork in the road, though whether it will lead us to Carmageddon or Carmaheaven has yet to be determined. Using interviews, data and deep exploration of the hidden world of ports, traffic control centers, and the research labs defining our transportation future, acclaimed journalist Edward Humes breaks down the complex movements of humans, goods, and machines as never before, from increasingly car-less citizens to the distance UPS goes to deliver a leopard-printed phone case. Tracking one day in the life of his family in Southern California, Humes uses their commutes, traffic jams, grocery stops, and online shopping excursions as a springboard to explore the paradoxes and challenges inherent in our system. He ultimately makes clear that transportation is one of the few big things we can change—our personal choices do have a profound impact, and that fork in the road is coming up fast. *Door to Door* is a fascinating detective story, investigating the worldwide cast of supporting characters and technologies that have enabled us to move from here to there—past, present, and future.

### **America's Infrastructure**

2018-12-15 Lisa Idzikowski  
Engineers argue that inadequate maintenance of

roads, bridges, airports, waterways, and other critical aspects of infrastructure along with underinvestment have created an infrastructure crisis in the United States. Many politicians agree with this claim and are attempting to take action. However, we are faced with the issue of which projects are most essential and how to fund them. Is the state of America's infrastructure that dire compared to the rest of the world? Are these efforts to improve it a cynical ploy from politicians to gain attention and ensure reelection? This volume considers the many perspectives of this pressing issue.

### **Inconspicuous Consumption**

2019-08-27 Tatiana Schlossberg \*First Place Winner of the Society of Environmental Journalists' Rachel Carson Environment Book Award\* "If you're looking for something to cling to in what often feels like a hopeless conversation, Schlossberg's darkly humorous, knowledge-is-power, eyes-wide-open

approach may be just the thing."--Vogue From a former New York Times science writer, this urgent call to action will empower you to stand up to climate change and environmental pollution by making simple but impactful everyday choices. With urgency and wit, Tatiana Schlossberg explains that far from being only a distant problem of the natural world created by the fossil fuel industry, climate change is all around us, all the time, lurking everywhere in our convenience-driven society, all without our realizing it. By examining the unseen and unconscious environmental impacts in four areas--the Internet and technology, food, fashion, and fuel - Schlossberg helps readers better understand why climate change is such a complicated issue, and how it connects all of us: How streaming a movie on Netflix in New York burns coal in Virginia; how eating a hamburger in California might contribute to pollution in the Gulf of Mexico; how buying an inexpensive cashmere sweater in Chicago expands the

Mongolian desert; how destroying forests from North Carolina is necessary to generate electricity in England. Cataloging the complexities and frustrations of our carbon-intensive society with a dry sense of humor, Schlossberg makes the climate crisis and its solutions interesting and relevant to everyone who cares, even a little, about the planet. She empowers readers to think about their stuff and the environment in a new way, helping them make more informed choices when it comes to the future of our world. Most importantly, this is a book about the power we have as voters and consumers to make sure that the fight against climate change includes all of us and all of our stuff, not just industry groups and politicians. If we have any hope of solving the problem, we all have to do it together. "A compelling-and illuminating-look at how our daily habits impact the environment."--Vanity Fair "Shows how even the smallest decisions can have profound environmental consequences."--The New York Times
